

Taking Char as input from the keyboard

20/07/2023

Jayasimha Y

## To take char as input from keyboard:

To take “char” as input from the keyboard (by the user) the following statement is used,

```
Scanner scan = new Scanner(System.in);  
char c = scan.next().charAt(0);
```

### Code for taking char as input from the user,

```
import java.util.Scanner
```

```
Class Demo
```

```
{  
    Public static void main(String []args)  
    {  
        Scanner scan = new Scanner(System.in);  
        System.out.println(“Enter the character”);  
        char c = scan.next().charAt(0);  
        System.out.println(“The character is ”+c);  
    }  
}
```
